

SUPERVISORS REVIEW OF BACHELOR'S THESIS

Author of bachelor's thesis: Janet Klaudie de Ceita

Supervisor of bachelor's thesis: Ing. František Vajkay, Ph.D

Title of bachelor work: **Detached Family Residence**

The students task was to create the project documentation for building realisation, specifically for that of a detached family residence. The building had to be designed for living only, making a comfortable living environment for a standard family.

Whereas Ms. de Ceita put some effort into it, the presented work meets those conditions. The internal disposition and shape of the building is the result of a long-term design process, and was consulted by architects.

The resulting building is composed of two floors. Within the first floor one can find the entrance hall, kitchen and living room among others. The second floor then includes the bedrooms and master bathroom.

The vertical structures are designed to be made from ceramic blocks, whereas the horizontal structures are composed of reinforced concrete slabs cast on site. All of this is protected by two extensive vegetative flat roofs. Since the construction site is located over flat plot the walls are constructed atop foundation strips.

Although Ms. de Ceita put some effort into the work and was consulting continuously, some issues arose when she had to look for proper solutions of problematic details throughout the solution of the work. Therefore, as the supervisor I award the presented bachelor thesis with the following grade:

ECTS classification: *D/2,5*

In Brno on 3rd of June 2016
