Dear Professor

I've been quite busy lately. Dennis has worked on his project satisfactorily in general. He had some issues about programming some parts of his project. I suggested couple of collaborators of mine to talk to but do not know his latest progress.
Regards

Tansal

Dear Prof. Tansal

Our student Denis Rexa processed his bachelor thesis "Ad Hoc Network Scenarios and Different Types of Attacks" in your university. For validation of his bachelor thesis we need your evaluation of Denis Rexa work and your opinions about him. I will be very glad, if you send me by e-mail short document about it as soon as possible.

Thank you very much

Best regards

Assoc. prof. Vladislav Skorpil
