# About the conference

Since 1994 every second year the Research and Education in Aircraft Design (READ) conference has been organized as a general forum for exchange of information about progress in aerospace engineering research. The unique character of the seminar is given by its focus also on aircraft engineering education and inclusion of juried student session. Following the success of the READ 2016, Warsaw, the 2018 seminar was held in Brno, Czech Republic.

Conference was focused on following topics - Aircraft Design, Aircraft Propulsion, Aerodynamics and Flight Mechanics, Avionics, Aircraft Maintenance, Aerospace Education, Materials and Technology in Aeronautics, Safety and Security, Unmanned Aerial Systems and Aeronautical Transport.
