

Supervisor assessment of Master's Thesis

Student: Samek Michal, Ing.
Title: Optimization of Aircraft Tracker Parameters (id 17054)
Supervisor: Smrž Pavel, doc. RNDr., Ph.D., UPGM FIT VUT

1. Assignment comments

The planned work was challenging, it corresponded to requirements of the external supervisor from the Reykjavik University and experts from the company defining the industrial context of the work. Michal Samek successfully accomplished the work and developed a solution that meets all requirements of the real use case.

2. Literature usage

The student actively collected relevant scientific sources and presented a survey that clearly characterizes the current state of the art in the field.

3. Assignment activity, consultation, communication

Michal Samek was fully active during the whole year, remotely discussed relevant steps and proposed solutions of encountered problems.

4. Assignment finalisation

The thesis was finished a month before the deadline, my feedback was fully reflected.

5. Publications, awards

6. Total assessment

excellent (A)

Considering the excellent activity during the whole year and the quality of the resulting system as well as the thesis, I suggest A grading of the work.

In Brno 11. June 2015
