

## SUPERVISORS REVIEW OF BACHELOR'S THESIS

Author of bachelor's thesis: Jakub Čupec

Supervisor of bachelor's thesis: Ing. František Vajkay, Ph.D

---

The students task was to create the project documentation for the realisation of building, specifically for the construction of a family residence.

Whereas Mr. Čupec put some effort into the work, the presented bachelor thesis meets those requirements. The internal disposition and shape of the building is the result of a long-term design process. The resulting building is composed of two floors. Within the first floor one can find the entrance hall, kitchen, living room among others and the workshop. The second floor then inherits the bedrooms.

The building is designed from timber frame based walls, which are sheathed from the exterior and interior as well. The horizontal load bearing structures are from wood as well. So that the peripheral structures would meet the necessary thermo-technical requirements they have an additional layer of thermal insulation on the outskirts.

Although Mr. Čupec clearly put a lot of effort into the creation of this particular project documentation, the opposite is valid for his approach to consultations. The student stopped by rarely only. I as the supervisor can award the presented work with the following grade only:

ECTS classification: *D/2,5*

In Brno on the 8th of June 2015
